

Opening Your Zip file

On a Computer (Windows/macOS):

1. Locate the ZIP File:

- Find the ZIP file link or the file itself on the website you're downloading from.
- Right-click on the link or the file.

2. Download the File:

- **On Windows:** Choose **Save link as...** or **Save target as...** from the right-click menu. Then, select the folder where you want to save the ZIP file and click **Save**.
- **On macOS:** Select **Download linked file as...** or **Save link as...**, then choose the location to save the ZIP file.

3. Access the ZIP File:

- Once downloaded, locate the ZIP file in your Downloads folder (or the folder you chose to save it in).

4. Extract the Contents:

- **On Windows:** Right-click the ZIP file and choose **Extract All** to extract its contents.
- **On macOS:** Double-click the ZIP file, and it will automatically extract into a folder in the same location.

On a Smartphone (iOS/Android):

1. Download the ZIP File:

- Tap the ZIP file link to start the download. The file will usually be saved to your device's default "Downloads" folder.

2. Extract the ZIP File:

- **On Android:** You might need a third-party app like **Files by Google** or **WinRAR** to open and extract the ZIP file.
- **On iOS:** Use the built-in **Files** app to locate and open the ZIP file, then tap to extract it.
